CelLine® MH Plank Security Ceiling System

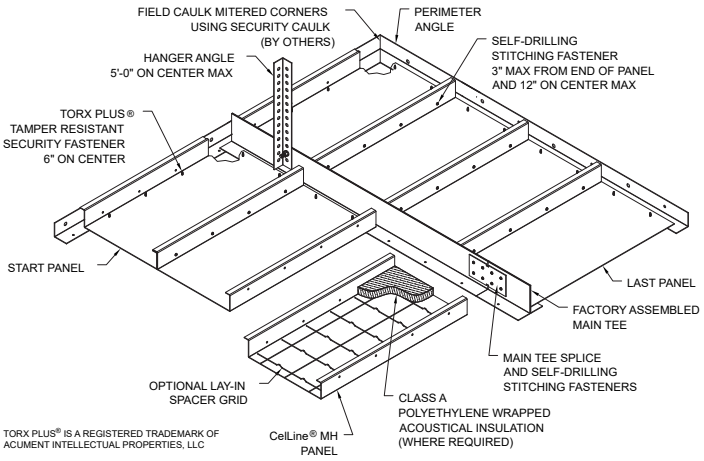
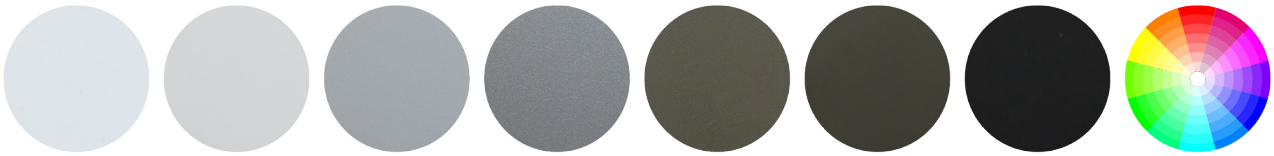
Gordon CelLine® MH Plank Security Ceilings are tamper proof and designed for high security environments. Typically installed in supervised areas or corridors of psychiatric facilities, CelLine® can be non-perforated or perforated for improved acoustical performance, substantially reducing overall noise levels in the facility. Our Durable, Antimicrobial, AAMA certified powder coating finishes offer infection control, occupant safety and maintainability while the Wood Look and Therapeutic color offerings help create a warm, comfortable space for patients, visitors and healthcare workers.

CelLine® MH Plank Security Ceiling Panels:

- 14 GA. or 16 GA. 24” wide galvanized steel panels (12” and 18” wide panels also availabile)
- 14 GA or 16 GA. galvanized steel perimeter angle
- Perforated or Non-Perforated
- NRC 0.80 and higher when integrated with Gordon’s CMA Acoustical Pads
- Security Light and HVAC Integration
- Access panels & 2’x2’ access doors are available



AAMA 2604 Powder Coating Finishes:



Wood-Look Finishes:
